1) Pic:
   - What is your Dx?!
     Hematoma of the Auricle
   - What is yours management?!
     Incision and drainage with pressure dressing and prophylactic antibiotics.
   - Give one complication?!
     Boxers Ear

2) 22 y/o pt. present with Rt. Ear hearing difficulty:
   - Describe what you see?!
     Rt. Ear perforated tympanic membrane.
     The perforation is centrally located at Anterior superior quarter mainly & it’s dry.
   - What type of hearing loss the pt. will have?!
     Conductive hearing loss
3) Pic:
- What is your Dx.?! 
  Acute mastoiditis
- What is your management?! 
  Cortical mastoidectomy. IV antibiotic and analgesia
- Give 2 complications?! 
  Intracranial abscess 
  Meningitis 
  Facial nerve paresis

4) Pic:
- Describe what you see?! 
  Normal audiogram at low frequencies with a Dip at 4K Hz
- What is your Dx.?! 
  SNHL due Noise exposure

5) Pic with Hx.:
- Describe what you see?! 
  Redness and swelling of tip of the nose 
  (Nasal Vestibulitis)
- What is your management?! 
  Antibiotics. Anti-congestion, analgesia & Never squeeze
- Give one complication?! 
  cavernous sinus thrombosis
6) Pic:
- Give 2 changes could be usually found in these Cases?!
  - Dull facial expression
  - Dilated and flattened nose
  - Open mouth
  - High vaulted palate
  - Protruding upper incisor teeth
    - What cause these changes?!
  - Adenoids
    - What is your management?!
      - Adenoidectomy

7) Pic:
- Describe what you see?!
  - Left glottic mass occupying ant. 2/3 of left vocal cord.
    - What is your Dx.?! 
      - SCC
        - Management?!
          - Surgery or radiotherapy

8) Pic:
- Describe what you see?!
  - Saddle Nose Deformity
    - Give 2 causes?!
      - Nasal trauma, Wegener granulomatosis (vasculitis)
      - Relapsing Polychondritis, leprosy, tuberculosis, Syphilis.
9) Pic:
   - What is the most common site where bleeding occur?!
     little’s area
   - Give 2 causes?!
     Trauma, HTN
   - Your management at home?!

   Direct digital pressure on the lower nose compresses the vessel on the septum and leaning forward

Q1) attico antral CPOM cholesteatoma
   - Description
   - Dx
   - Type of discharge
   - Management

Q2) Boxer's ear
   - cause
   - management

Q3) ottosclerosis description of the audiogram
   - Dx
   - Treatment

Q4) periorbital cellulitis
   - Description
   - Dx
   - Management

Q5) acute mastoiditis
- Complication
- Management

Q6) grommet tube
    - Indications
    - Complications

Q7) adenoid facies 2 features
    - Cause
    - Treatment

“The physician should not treat the disease but the patient who is suffering from it”
